Installation Guidelines - Generac Power Systems

Generac electric start generators, except those two GP models come with an external charger. The customer should charge the battery at least once a month for 24-48 hours in preparation for usage. If the battery is dead, most of the portables have a recoil backup (pull start).

Generac's HomeLink™ manual transfer switch is compatible with generators starting at 5kW with a 30-Amp L14-30 receptacle. The HomeLink™ manual transfer switch can safely deliver power to 8-10 of your most essential circuits, allowing you to back-up your refrigerator and freezer, gas furnaces, lights, small kitchen appliances and well pump.

Generac produces a range of generators that are designed to provide maximum power with maximum portability. But the benefits of going with one of these units will soon dissipate if you start to suffer from serious issues, such as overheating, tripped circuit breakers or a wrongly configured fuel valve.

generator. Refer to owner's manual for decal location. Record the model and serial numbers in the spaces provided on the inside front cover of this manual. (000100a) WARNING Consult Manual. Read and understand manual completely before using product. Failure to completely understand manual and product could result in death or serious injury ...
