A fluid flowing around the surface of an object exerts a force on it. Lift is the component of this force that is perpendicular to the oncoming flow direction. It contrasts with the drag force, which is the component of the force parallel to the flow direction. Lift conventionally acts in an upward direction in order to counter the force of gravity, but it can act in any direction at right ...

Aug 19, 2016 · Please note this advice is continually checked and updated! Including for COVID. ~~~~~ Today's post is a long overdue post on CVs. While the CV genre permits a wide range of variation, and there is no consensus on the value or desirability of one particular style, I am going to present a list of expectations that govern my own work at The Professor Is In.
