List of active Solar System probes - Wikipedia

This is a list of active space probes which have escaped Earth orbit. It includes lunar space probes, but does not include space probes orbiting at the Sun–Earth Lagrangian points (for these, see List of objects at Lagrangian points). A craft is deemed "active" if it is still able to transmit usable data to Earth (whether or not it ...

**S Phase:** To produce two similar daughter cells, the complete DNA instructions in the cell must be duplicated. DNA replication occurs during this S (synthesis) phase. **Gap 2 (G2):** During the gap between DNA synthesis and mitosis, the cell will continue to grow and produce new proteins. At the end of this gap is another control checkpoint (G2 Checkpoint) to determine if the cell can now proceed to ...

Swiss Scientists Calculate Pi To A Record-Breaking 62.8 Trillion Decimals! Even those that do not particularly care for math will agree that pi, or "π," is fascinating. The numerical constant — defined as the ratio of the circumference of a circle to its diameter— is recognized by most as 3.14. However, Pi is an irrational number.

## Reading Super Scientists Worksheet.pdf

Super Scientists Crossword Puzzle (pdf) and Super Scientist Test (pdf) - Thanks to Malissa Lyons for sharing these worksheets! NOTE: The challenge worksheet provided has been designed to be copied back-to-back.

Whether you are teaching biology, hydrology, botany, or chemistry, or just studying the lives and work of famous scientists in general, each of the following sets of worksheets contains multiple individual reading passages for your students. Two separate answer sheets are associated with each passage. One is a multiple choice worksheet and the ...

Scientists couldn't believe it at first. Parts of Mercury reach 800 degrees Fahrenheit (427 degrees Celsius), so they definitely didn't expect to find ice! But it turns out the poles of Mercury are ... Super Teacher Worksheets - [www.superteacherworksheets.com](http://www.superteacherworksheets.com) Did you know.... Even though Mercury is the closest planet to the sun, it is

The solid form of carbon dioxide, commonly known as Dry Ice, is used in theatres to create stage fogs, to do super cool science experiments, and make things like "magic potions" bubble. Liquid carbon dioxide mainly exists when carbon dioxide is dissolved in water. Carbon dioxide is only water-soluble when pressure is maintained.
